

## HOW MANY SOIL SAMPLES DO YOU NEED?

Scott Reuss<sup>1/</sup>

This presentation analyzes the fertilizer recommendation differences brought about through the use of different acres per soil sample regimens. Three Marinette County farms will be used as case studies, as well as a review of applicable literature which has researched this topic.

With ever-narrowing farm profit margins, the questions about how many samples per field are necessary are still valid questions on farmers' minds.

For a complete copy of this presentation, please contact Scott Reuss, Marinette Co. Courthouse, 1926 Hall Ave., Marinette, WI, 54143; (715) 732-7510.

<sup>1/</sup> Marinette County Agricultural Extension Agent, Marinette County UWEX Office.
