# Components of Insurance Premium

## ✓ Fixed Costs

- Selling Expense/Commissions
- Underwriting Expense/Rating
- Loss Control/Safety Engineering
- General Administrative/Clerical
- Depreciation/Amortization
- Boards & Bureaus/Premium Tax

# Components

- ✓ Fixed costs – 25% to 35%
- ✓ Profit – 2% to 5%
- ✓ Loss and Loss Adjustment Expenses – 65% to 80%
- ✓ Premiums collected and held in reserve  
= investment income

# Major Types of Property/Casualty Insurance

- ✓ Fixed plant and equipment – Property Insurance
- ✓ Inventory – also a part of Property Insurance
- ✓ Rolling Stock other than autos - Inland Marine Insurance
- ✓ Autos, trucks and other vehicles licensed for road use
- ✓ Loss of cash flow – Business Income
- ✓ Bodily injury or property damage to a third party
- ✓ Injury to Employees – Workers' Compensation

# Cost Reduction Techniques

## ✓ Property/Inland Marine Insurance

- Construction – Fire resistive – steel - frame
- Protection – characteristics of construction that reduce the chance of loss
  - Fire suppression systems/alarms/sprinklers
  - Dust suppression systems
  - Fences
  - Locks
  - Lighting
  - Wind resistive roofs

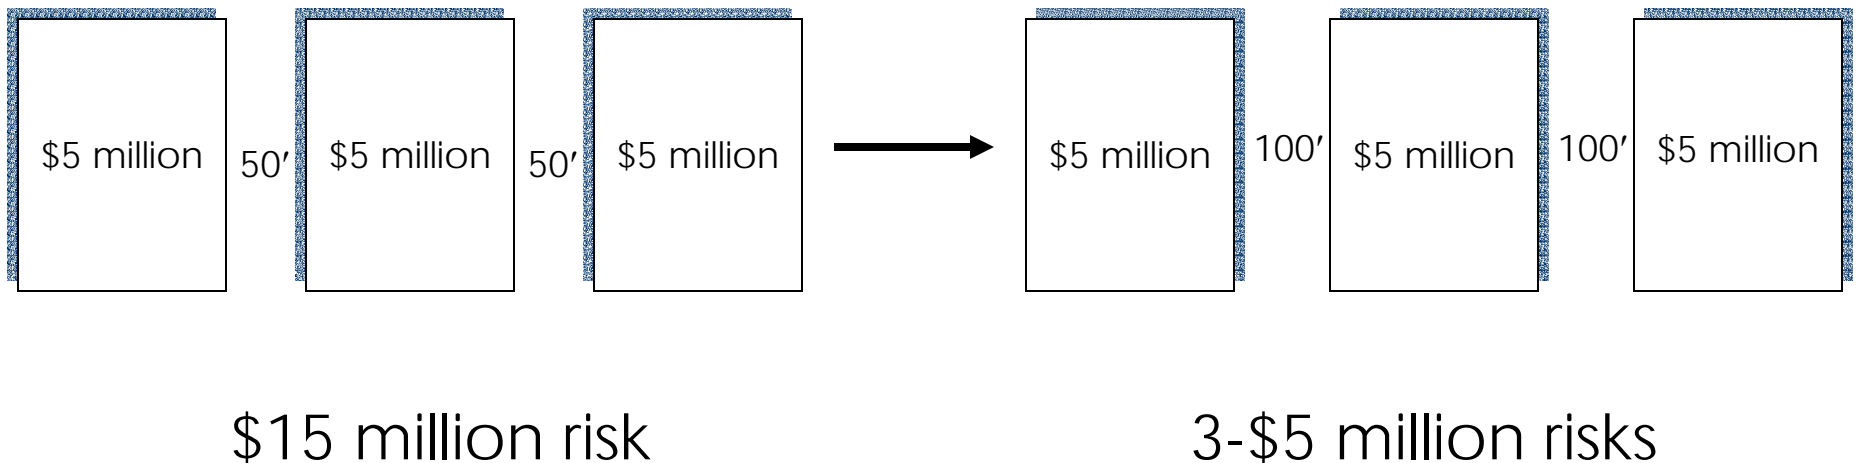

# Cost Reduction Techniques (continued)

## ✓ Property/Inland Marine Insurance

- Exposure – the proximity of your property to external loss from another source or hazard.

# Cost Reduction Techniques (continued)

## ✓ Property/Inland Marine Insurance

- Actual Cash Value (ACV) – Replacement cost minus depreciation.
- Replacement Cost (RV) – the replacement of existing property with like and kind materials.
- Inland marine equipment is normally ACV.

# Cost Reduction Techniques (continued)

## ✓ Property/Inland Marine Insurance

- Reporting form – all grain facilities should be on an inventory reporting form.
- Deductibles
- Self-insure – What is an acceptable amount of risk for you to assume? Do you need to insure all of the lowered valued equipment?
- Ask questions

# Cost Reduction Techniques (continued)

## ✓ General Liability Insurance

- Field grade grain versus identity preserved, food grade or organic grains
- Premise exposures
  - General condition
  - Is Property well maintained
  - Access by general public
  - Nuisance hazards

# Cost Reduction Techniques (continued)

## ✓ General Liability Insurance

- Off-premises exposures
  - “On Farm” grain retrieval
  - Other people “borrow” your equipment
- Product exposures
  - Warranties or representations
  - Product integrity
  - Reasonable protection of the food chain

# Cost Reduction Techniques (continued)

- ✓ **General Liability Insurance**
  - Payroll rating issues
    - Eliminate clerical payroll
    - Eliminate driver payroll
    - Eliminate overtime payroll
    - Limit Executive Office payroll
    - Excise sales tax removed
    - Inter-company sales
    - Properly classified
    - Property damage deductibles

# Cost Reduction Techniques (continued)

## ✓ Auto Fleet Insurance

- Rating
  - Garage location
  - Cost
  - Usage
  - GVWR
  - Radius of operation
- Seasonal Rating
- Self-Insurance – Caution: number of vehicles stored in one building
- Deductibles

# Cost Reduction Techniques (continued)

## ✓ Workers' Compensation

- Rating
  - Experience Rating
    - Monitor claim reserves
- Classification
  - Multiple job duties
- Executive Officer Payroll
- Overtime payroll
- Self-Insure

# Cost Reduction Techniques (continued)

## ✓ Experience/Schedule Rating

- Experience Rating – 25% debit to 25% credit
  - Optional – all classes except Workers' Compensation
  - Frequency and severity of claims
- Scheduled rating – 25% debit to 25% credit
  - Optional – all classes
  - Years in business
  - Tenure and experience of management
  - General housekeeping
  - Maintenance
  - Safety programs
  - Financial condition

# Cost Reduction Techniques (continued)

## ✓ Safety Programs

- Goals
  - Reduce number of hazards and risks of injury
  - Decrease the rates of accidents and injury
  - Control the cost of accidents and injuries
- Causes
  - Accidents result from unsafe acts, not unsafe conditions
  - Influence employees' decisions
- Accountability
  - Safety standards are words on paper
  - Accountability makes them work

# Cost Reduction Techniques (continued)

## ✓ Safety Programs

- Evaluation - Evaluate and change your safety program to meet changing needs.
- Measure and Reward – Positive Reinforcement
  - Structure – no “One Size Fits All”

# Claims Management Program

- ✓ Claim Reporting Process
- ✓ Mitigate the claim
- ✓ Determine cause/correction
- ✓ Communication channels

# Conclusion

- ✓ Understand each type of insurance you have
- ✓ Safety Program
- ✓ Effective claims management
- ✓ Select an insurance company and agent who understands your needs

# Review & Questions

---

Thank You!!
